Indian Cement Sector

India's Cement Industry Sector is set to grow at a 7% CAGR over the next five years and will reach 550+ million tonne capacity from the current 500 million tonnes by 2025.

In this scenario, we bring this Cement Directory 2023, which is an attempt to report on the cement companies with cement producers profile, current capacity, expansion plans etc., along with details of address, tel, fax, email and details of key personnel.

The directory covers all cement plants – covering 98 % of cement production capacity all over India.

Overview

Indian Cement industry, is the second largest producer of cement in the world following China. It is expected to reach 550 to 600 million tonnes by the year 2025. The sector is dominated by 20 companies which accounts for more than 70% of the output.

The sector is on the rise, following government infrastructure spending for smart cities and other highway projects which is increasing the cement demand. Though the housing sector forms 67% of cement demand in India, infrastructure forms around 13% demand, the commercial construction 11% and industry segment 9%. The industry is expected to add 69 million tonnes over the next 3 years to raise the capacity to 550+ million tonnes.

A total of 210 large cement plants together account for 97 per cent of the total installed

Cement Capacity Addition vs Year

capacity in the country, while 365 small plants account for the rest. Of these large cement plants, 77 are located in the states of Andhra Pradesh, Rajasthan and Tamil Nadu. The Indian

cement industry is dominated by a few companies.

Currently, the Indian industry is adding around 18-20 million tonnes of cement production capacity, though around 30% to 40% of its current capacity is lying idle. The industry always increases capacity before expansion of market. The expansion activity which started at the end of last boom in 2011, has added over 230 MT.

Factors driving Growth

- Development of Smart Cities announced by Union Government which covers 98 cities
- 'Housing for All' to construct 1 Crore house for poor by 2019 (In India, housing sector accounts for a significant 67 per cent of the total cement demand (USA: 22 per cent; China: 25 per cent; Brazil 56 per cent))
- North East India is witnessing a construction boom which is driving up new capacity expansion by major players.
- Sagarmala Project, proposes development of fourteen Coastal Economic Zones (CEZ) across the major and non-major ports of India. The project aims to enhance cement production by 40 MTPA by 2025, and make domestic manufacturing more competitive
- Government of India has decided to adopt cement instead of bitumen for the construction of all new road projects on the grounds that cement is more durable and cheaper to maintain than bitumen in the long run

THE ROAD AHEAD

Cement Industry is likely to grow from virgin markets of tier III construction in rural India and also the industry will generate growth through exports in Gulf and South East Asia markets. Indian companies will also explore raising capital from global markets through FCCB route or GDR route. Indian government is also expected to introduce market friendly reforms, making India a globalized cement market place.

Though the industry has done with current round of expansion programme. It has saturated its brownfield capacity expansion and maximum optimization efficiency has been achieved. Further capacity will be added after 2022 via greenfield projects. The current over capacity is putting inevitable pressure on price and profitability, the silver lining is that surplus capacity is likely to moderate over the next year with government increased spending on infrastructure. In the long run, housing sector will continue to drive cement sector growth.

Ibis Cement Directory 2023 – is one of the top sources of information available in Indian Cement Sector. This directory provides every detail about the sector – it contains **profiles of** all leading cement companies and their plants, their history, **acquisitions, co-generation, upcoming capacity,** New projects, technology up gradation plans, plans, investments, details of **captive power plants** etc.,

The directory contains key personnel details of **603** Indian Cement Plants along with their **direct email-ids,** **telephone numbers, mobile numbers** and **2,480 + contact details of all cement plants in the country – with address, tel/fax/mobile/email etc.,**

How to Order?

Please visit <http://www.industry-focus.net/cement-directory>

Add the product to Cart and Click on **Checkout**

The screenshot shows the product page for 'Cement Directory 2023'. At the top, there is a search bar and a shopping cart icon showing '0 item(s) - ₹0'. Below the navigation bar, the breadcrumb trail is 'Home > Directories > Cement Directory 2023'. The main product image shows the directory book. To the right, the product title 'Cement Directory 2023' is displayed with its product code 'Cement-Directory-2023' and availability 'In Stock'. The price is listed as ₹4,950. There is a quantity input field set to '1' and an 'Add to Cart' button. Below the price, there are social media sharing options (Like, Tweet, Share) and a review section showing '0 reviews / Write a review'. On the left, there are tabs for 'Description', 'Specification', and 'Reviews (0)'. The 'Specification' tab is active, showing a table with details about the directory.
