# Chhattisgarh and Madhya Pradesh

India's central states of Chhattisgarh and Madhya Pradesh are mineral rich states with predominant rural population.

However, over the last decade, the states have shown enormous impetus in attracting investment in industries ranging from IT, ITES, Engineering, Cement and heavy industries. These states also has surplus power.

In this scenario, we bring this State Directory of Chhattisgarh and Madhya Pradesh Directory 2026, which is an attempt to profile the industries, manufacturing facilities and companies with their company profile, expansion plans etc., along with details of key personnel, address, tel/fax/email etc.,.

The directory covers all manufacturers in Chhattisgarh and Madhya Pradesh covering sectors like cement, steel, sugar, food, metal, engineering and miscellaneous.

## Overview

Chhattisgarh is a state located in the central part of India. The state has a diverse industrial climate and is known for its rich mineral resources, which are a major contributor to the state's economy. Chhattisgarh is home to several large and small-scale industries, with a focus on sectors such as steel, power, mining, cement, aluminium, and agriculture.

### Opportunities:

Chhattisgarh has a vast potential for growth in the industrial sector. The state government has implemented several policies and initiatives to encourage investments and promote ease of doing business. The state has a dedicated industrial policy, which offers several incentives and concessions to investors. The policy aims to create an investor-friendly environment, promote sustainable growth, and increase employment opportunities in the state.

### Business:

The state is known for its rich mineral resources, particularly iron ore, coal, and limestone. It is home to several large and small-scale steel plants, cement plants, power plants, and aluminium plants. The state has several SEZs (Special Economic Zones) that offer various incentives to companies particularly in Solar power and IT and ITES. These SEZs in Chhattisgarh are located in areas such as Raipur, Bilaspur, and Durg.

## Madhya Pradesh

The industrial climate in Madhya Pradesh, located in the central region of India, has been improving steadily in recent years. The state government has been making efforts to attract investment and facilitate ease of doing business, resulting in an increase in the number of industrial projects being set up in the state. The state has an abundance of natural resources, including minerals such as coal, diamond, copper, limestone, and manganese, which can be utilized in various industries. Additionally, the state has a well-developed transportation network, the recent opening of Nagpur Expressway and many others facilitates the movement of goods and raw materials to and from various parts of the country.

# Chhattisgarh and Madhya Pradesh

One of the key sectors in which Madhya Pradesh has a strong potential for growth is the manufacturing sector. The state has a large number of small and medium-sized enterprises (SMEs) in various industries such as textiles, leather, engineering, and pharmaceuticals. The state government has been offering various incentives such as subsidies and tax breaks to encourage the growth of the manufacturing sector. Additionally, the state government has set up industrial clusters in various parts of the state, which provide infrastructure and support to small and medium-sized businesses.

Another sector in which Madhya Pradesh has a strong potential for growth is the food processing industry. The state has a large agricultural base, with crops such as wheat, rice, soybean, and pulses being grown in abundance. The state government has been promoting the food processing industry by offering various incentives such as subsidies and tax breaks. Additionally, the state government has set up food parks in various parts of the state, which provide infrastructure and support to food processing businesses.

Madhya Pradesh is also rich in mineral resources, and the mining sector has traditionally been an important sector in the state. The state has a large number of mines producing minerals such as coal, diamond, copper, limestone, and manganese. The state government has been promoting the mining sector by offering various incentives such as subsidies and tax breaks. Additionally, the state government has been working to streamline the mining approval process and improve infrastructure to facilitate the movement of minerals.
