Indian Pharma Sector

India's pharma sector has been growing at double digits for several years.

Its size is expected to reach US\$ 120 billion by 2030. The growth in Indian domestic market will be on back of increasing consumer spending, rapid urbanization, and raising healthcare insurance and so on. With changing lifestyle, India is also catching up lifestyle diseases of the west. Further, the pandemic is also provides new opportunities.

In this scenario, we bring this Pharma Directory 2026, which is an attempt to report on the pharma companies with profile, current capacity, and expansion plans etc., along with details of address, tel, fax, email and details of key personnel.

The directory covers all pharma plants –all over India. It covers all segments viz. Formulations, Bulk Drugs/API's/ Intermediates and CRAMS(Contract Research and Manufacturing Services).

Overview

Indian pharmaceuticals market is the third largest in the world in terms of volume. In terms of value it is ranked 13 in the world. It has the largest no. of FDA approved plants (around 500+) outside USA. It is the largest provider of generic drugs globally. Indian pharmaceutical sector supplies over 50% of global demand for various vaccines, 40% of generic demand in the US and 25% of all medicine in the UK. The industry is expected to grow at 20% over the next 5 years. Currently, the industry is growing at 10-12%.

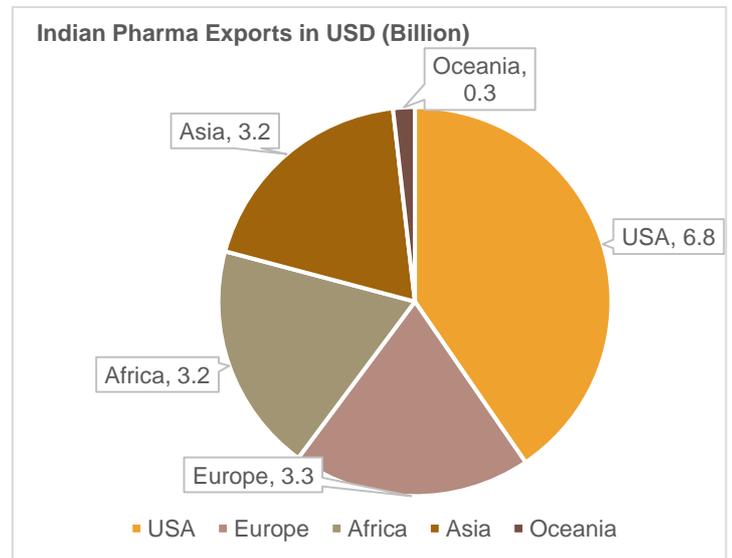

India made a turnaround after patents regime, by focusing on reverse engineering new process and to manufacture the same at low cost. India is still to become a player in terms of drug innovation.

The Indian pharmaceutical industry holds a strong position in terms of production volumes in the global pharma market as the country contributes around 10% of the world production volumes and in terms of value, India holds a share of around 2.4% globally.

Indian pharmaceutical sector supplies over 50% of global demand for various vaccines, 40% of generic demand in the US and 25% of all medicine in the UK. The domestic pharmaceutical industry includes a network of 3,000 drug companies and ~10,500 manufacturing units. India enjoys an important position in the global pharmaceuticals sector.

The Indian pharma market size is expected to grow to US\$ 120 billion by 2030. The growth in Indian domestic market will be on back of increasing consumer spending, rapid urbanization, rising healthcare insurance and so on. With changing lifestyle, India is also catching up lifestyle diseases of the west.

Indian pharma sector is broadly classified into 3 segments viz. Formulations, Bulk Drugs/API's / Intermediates and CRAMS – Contract Research and Manufacturing Services.
